

Next Gen Bucket Measure up

You will need an Engineers scale tape measure (Tenths), level (Preferably a smart level), and a plumb bob with a magnet to complete a Bucket Measure Up.

1. On the Cat Screen tap the menu button 
2. Tap the drop down arrow on the bottom of the screen and find the section titled **“Bucket/Work Tool Settings”**
3. Select a new bucket so the white circle is filled and tap the arrow to the right of the new bucket

4. Accept the Warning
5. Tap on the Bucket Name tab and rename the bucket to something you and others will know. Tap OK when done
6. Tap on **“Bucket Measure-up”** and Accept the Warning
7. Tap through the Attention pop up and begin doing the measurements as shown on screen using the  button
8. Fill in the measurements using tenths. Tap the accept button after you have successfully entered the measurement in the box to go to the next measurement.
9. Continue through until there are no more measurements to be taken.
